Reviews

Genetic toxicology of propylene oxide and trichloropropylene oxide – a review
A.K. Giri (India) 1

Statistical methods for short-term tests in genetic toxicology: The first fifteen years
L. Edler (U.S.A.) 11

DNA adduct formation by 12 chemicals with populations potentially suitable for molecular epidemiological studies
M. Uziel, N.B. Munro, D.S. Katz, T. Vo-Dinh, E.A. Zeighami, M.D. Waters and J.D. Griffith (U.S.A.) 35

The genotoxicity of industrial wastes and effluents. A review
V.S. Houk (USA) 91

Spontaneous mutagenesis: Experimental, genetic and other factors
K.C. Smith (USA) 139

Cellular and molecular advances in elucidating p53 function
J.W. Shay, H. Werbin, W.D. Funk and W.E. Wright (USA) 163

The genetic toxicology of cinnamaldehyde
T. Neudecker (Germany) 173

Review of the mutagenicity/genotoxicity of butylated hydroxytoluene
E.M. Bomhard, J.N. Bremmer and B.A. Herbold (Belgium) 187

Mutagenicity of azo dyes: Structure–activity relationships
K.-T. Chung and C.E. Cerniglia (USA) 201

Review of the genotoxicity of ozone
K. Victorin (Sweden) 221

Using the polymerase chain reaction to estimate mutation frequencies and rates in human cells
G.A. Cortopassi and N. Arnheim (USA) 239

Recombinant DNA approaches for the development of metabolic systems used in in vitro toxicology
R. Langenbach, P. Blaise Smith and C. Crespi (USA) 251
